

We cut to internal car shots of the gang.

CODY

This is awesome! This is like Platoon with Oliver stone, we're living it, we're feeling it. This reminds me of the time I drove across Africa with Patrick Stewart in a dune buggy high as kites on drugs..... We were searching for ...diamonds... or was it parts of an android...?

LAURA

I think you're confusing a dream involving Fear and Loathing and Nemesis with your past...

CODY

Oh yeah, I loved that movie...

LAURA

Which one?

CODY

Fear and Loathing in Space

CAM

Damn, Cody sounds like he's on to something, we should make that as our next film. I'll start researching it immediately.

JENNY

So Cody I was reading your wiki last night. It's supposed to be a big mystery why you stopped acting all of a sudden back in the 90's.

Upon hearing this, Cody grabs Cam's flask and takes a big pull.

CODY

Some things are private.... I don't want to get in to it, okay?
